KESTREL HAWK SPECIFICATIONS: (Wood Outboard Limb - 1" shorter)

Tip to Tip Length:	39.75"	Available Draw Weights:	35-55 lbs 50-70 lbs
Brace Height:	6"	Available Draw Lengths:	24.5" - 26.5"
Let Off:	65% - 80%		

With over 30 years of design and hunting experience built in, the C.P. Oneida Kestrel will enhance your hunting experience.

The Kestrel features redesigned cams with an incorporated draw stop, machined riser, Engineered Structural Composite outboard limbs, Gordon glass power limbs and two finishes to choose from.

The Kestrel is the shortest model we have ever offered, which increases maneuverability in the ground blind and tree stand. The riser design provides true center shot arrow and string alignment, resulting in more energy being effectively delivered to the arrow.

Contact us and we will help you locate a dealer near you, then your Oneida Experience can begin.

TALON

The Talon bows are built with the high standard of quality that goes into every C.P. Oneida Eagle bow. It is built from a new lightweight, durable casting and offers a wide range of poundage and let-off selections. Like the complete Oneida line of bows, the Talon comes with an assortment of interchangeable modules that make draw-weight and let-off adjustment an easy, do-it-yourself project. This incredibly light, fast drawing, quick-pointing bow is designed with the shooting capabilities suited for any hunting situation.

SPECIFICATIONS:

Tip to Tip Length:	44" - 45.5"	Available Draw Weights:	30-50 lbs
Brace Height:	6" - 7"	Available Draw Lengths:	25.5" - 31.5"
Let Off:	50% - 80%		

AVAILABLE BOW COLORS:

- 1 - Next G-1 Camo
 - 2 - Flat Black
 - 3 - Next G-1 Camo & Flat Black

HAWK

The Hawk is created with C.P. Oneida's same dedication to quality and craftsmanship that goes into our entire line-up of bows. It is designed to meet the needs of small-framed adults, women and youngsters who have a shorter-than-normal draw length. The Hawk provides exceptional speed and deep penetration while keeping with Oneida's smooth draw and easy let-off. Any hunter, young or old, will have complete confidence in this top-of-the-line Oneida Bow.

SPECIFICATIONS:

Tip to Tip Length:	42"	Available Draw Weights:	25-50 lbs
Brace Height:	6"	Available Draw Lengths:	22.5" - 26"
Let Off:	50% - 80%	Shorter Draw Lengths Available	

AVAILABLE BOW COLORS:

- 1 - Next G-1 Camo
- 2 - Flat Black
- 3 - Next G-1 Camo & Flat Black

OSPREY

The Osprey bows are built with the high standard of quality that goes into every C.P. Oneida Eagle bow. It is built from a new lightweight, durable casting and offers a wide range of poundage and let-off selections. Like the complete Oneida line of bows, the Osprey comes with an assortment of interchangeable modules that make draw-weight and let-off adjustment an easy, do-it-yourself project. This incredibly light, fast drawing, quick-pointing bow is designed with the shooting capabilities suited to make the 'snap-shot' that most bow-fishermen are presented with.

SPECIFICATIONS:

Tip to Tip Length:	44" - 45.5"	Available Draw Weights:	30-50 lbs
Brace Height:	6" - 7"	Available Draw Lengths:	25.5" - 31.5"
Let Off:	50% - 80%	Stainless Hardware	

AVAILABLE BOW COLORS:

- 1 - White Reaper
- 2 - Next G-1 Camo
- 3 - Flat Black
- 4 - Black Reaper

ALSO AVAILABLE IN CUSTOM BUILDS

- 2 cam sizes
- 3 outboard limb sizes

ACCESSORIES

Dampening System

Reduces cable noise and increases cable life.

ESC LIMBS

Engineered Structural Composite

The ESC - Engineered Structural Composite limbs are molded to within .001 inch tolerance, which yield perfectly matched top and bottom bow limbs, giving you a perfect deflection between limbs. The composite used in our limbs is the same material used in the NASA space program, and can withstand extreme changes in temperature and moisture without warping.

Richardson**
Seminar Speaker
Master Caller

The C.P. Oneida Eagle Bow company has been owned and operated by Claude Pollington and his family since 2000. It was at that time having spent years as an Oneida dealer, assisting in research and development of the products, he purchased the Oneida Bow Company. His purchase was based on a desire to improve the product line and to ensure that this unique bow design remained available to loyal customers around the world.

Claude knew that day in 1982, when Ted Nugent gave him his first Oneida bow, that he was holding something special. The bow felt good, aimed easily and shot with authority. He was sold. Early the following year, he took on an Oneida dealership. Claude has been hunting for over five decades, yet still realizes that every day spent hunting is a learning experience. Some of this experience, company history, and whitetail wisdom can be found in this book

"The Life of the Legendary Whitetail Wizard."

Each C.P. Oneida Eagle bow features Engineered Structural Composite outboard limbs, centered string alignment, ease of tuning and years of experience built in. The ESC limbs are molded to exacting tolerances, impervious to the elements and are indestructible under normal use. Cam positioning ensures equal power distribution to the limbs. It provides straight and level nock travel. It reduces arrow oscillation and greater energy transfer to the arrow. And as those who have shot an Oneida bow can attest, the smoothest draw in the industry.

So join us, in the Oneida experience. Whether it is in the woods, on the water, or in competition - we have a bow that will help make you successful.
